EDUCATION

Gurukula Kangri Vishwavidyalaya, Haridwar

B.Tech in Computer Science and Engineering

Aug 2024 – Jun 2028

CGPA: 8.51

Indian Institute of Technology Madras, Chennai

BS in Data Science and Applications

Jun 2024 – Jun 2028

Maruti H.S. School, Rewa

Senior Secondary (Class XII)

Jun 2023

Percentage: 79

TECHNICAL SKILLS

- **Programming:** Java, Python, JavaScript, SQL
- **Full Stack Engineering:** React, Next.js, Tailwind CSS, Node.js, Express.js, FastAPI, MongoDB, REST APIs
- **AI & Machine Learning:** Python, TensorFlow, NumPy, Pandas, Gemini API, Hugging Face, scikit-learn, PyTorch
- **Cloud & DevOps:** Docker, Vercel, Git, GitHub
- **Developer Tools:** VS Code, Postman, Render, Linux/Unix

PROJECTS

CollegeMart | GitHub Repo

- Architected and deployed a full-stack campus P2P marketplace with **React** frontend and **Node.js/Express.js REST API** backend, supporting secure college-domain authentication via **JWT**.
- Designed a **MongoDB** database schema with optimized queries for product listings, user profiles, and real-time buyer-seller communication, reducing average response time by **30%**.
- Built advanced search and filtering, wishlist, seller profiles, and an admin dashboard with role-based access control (**RBAC**) to manage **1,000+** student users.

Placement Portal | GitHub Repo

- Built a role-based campus recruitment platform supporting Admin, Company, and Student workflows with company approval, placement drive creation, and application status tracking for **200+** students.
- Designed a normalized **SQLite** database with efficient CRUD operations and server-side validation; built responsive UIs using **Bootstrap** and **Jinja2** templates across desktop devices.

Expense Tracker Web Application | GitHub Repo

- Built a responsive **React** single-page application with **Tailwind CSS** for personal finance management, featuring transaction CRUD, category/date filtering, and monthly budget configuration.
- Integrated **Chart.js** to render dynamic bar, pie, and line charts for visual spending analytics, improving financial insight visibility across **100+ transaction types**.
- Developed a **CSV export** feature using **FileSaver.js** to generate date-stamped downloadable expense reports, improving data portability and record management for end users.

EXPERIENCE

Edunet Foundation (Microsoft AI NSI)

Apr 2025 – May 2025

AI/ML Intern (Remote)

- Engineered a Smart NLP Chatbot using Python, applying text preprocessing, tokenization, and model tuning techniques to improve response accuracy by 25% over baseline.
- Managed end-to-end ML pipeline — from raw dataset preparation and model training to cloud deployment — delivering a fully integrated chatbot web application.

RELEVANT COURSEWORK

- Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)

ACHIEVEMENTS

Industry Solve Hackathon 2026 — IIIT Delhi

March 2026

- Secured **7th rank** among 100+ teams in a national-level hackathon organized by CiPD and STMicroelectronics.
- Built RakshakEdge, an edge-AI surveillance system with offline detection and GSM alerts using OpenCV and TensorFlow Lite.

Jnanagni TechFest Hackathon

March 2025

- Secured **1st rank** among 100+ participants in a college-level coding and development hackathon under time constraints.

Active Member, IITM Coding Club

May 2025

- Actively participated in hackathons and coding competitions, contributing to a collaborative and innovative environment.
